

03 Food safety and nutrition procedures

03.2 Food for play and cooking activities

Some parents and staff may have strong views about food being used for play. It is important to be sensitive to these issues. For example, children who are Muslim, Jewish, Rastafarian, or who are vegetarian, should not be given any food to play with that contains animal products (Gelatine). Food for play may include dough, corn flour, pasta, rice, food colourings/flavourings.

- Jelly (including jelly cubes) is not used for play.
- Food for play is risk assessed against the 14 allergens referred and is included in the written risk assessment undertaken for children with specific allergies.
- Staff are constantly alert to the potential hazards of food play, in particular choking hazards and signs of previously undetected allergies.
- Foods that are cooked and used for play, such as dough, have a limited shelf life.
- Cornflour is always mixed with water before given for play.
- Cornflour and cooked pasta are discarded after an activity; high risk of bacteria forming.
- Utensils used for play food are washed thoroughly after use.

Children's cooking activities

- Before undertaking any cooking activity with children, members of staff should check for allergies and intolerances by checking children's records.
- Children are taught basic hygiene skills such as the need to wash hands thoroughly before handling food, and again after going to the toilet, blowing their nose or coughing.
- The area to be used for cooking is cleaned
- Utensils provided are for children to use only when cooking, including chopping/rolling boards, bowls, wooden spoons, jugs, and are stored in the kitchen.
- Members of staff encourage children to handle food in a hygienic manner.
- Food ready for cooking or cooling is not left uncovered.
- Cooked food to go home is put in a refrigerated until home time.
- Food play activities are suspended during outbreaks of illness.
